

Accessories for pneumatic stroke and rotary actuators – CLASSIC and ELEMENT process valves

- Complete modular designed accessory program
- More for less - optimal configuration costs
- Easy maintenance and commissioning
- Increase system and operational safety

Type 2XXX can be combined with...

Type 2000
Angle-seat valve

Type 2002
Compact angle-seat valve

Type 2030
Plastic diaphragm valve

Type 2031
Diaphragm valve

Type 2012
Globe valve

Type 210X
ELEMENT Process valve

The modular designed accessory option package is the comprehensive addition to the Bürkert process valves with pneumatic, linear or quarter-turn actuator (Types 2000, 2002, 2012, 2030, 2031, 2031K, 2050, 2652, 2655, 2658, 2672, 2675). The flexible, easily accessible concept of modular accessories has been designed to cover individual application requirements in a cost-effective way.

The design has been optimized for easy installation (retro-fitting), commissioning and operation.

Type 8697, electrical position feedback

The electrical position feedback Type 8697 is optimised for integrated mounting on the CLASSIC 20XX series. Mechanical or inductive limit switches register the position of the valve und gives an electrical feedback signal to the control system.

Besides the electrical position feedback signal the position of the valve is visually shown via LEDs. The housing is easy to clean and features proven electrical IP protection and chemicallyresistant materials for use in hygienic processing, in food, beverage and pharmaceutical industries.

Electrical position feedback

Technical data	
Material	plastic
Electrical connection	solder connections, cable entry sealed by gland with cable grip to suit cable Ø 5-9 mm
Protection class category	IP65
Max. continuous temperature	+125 °C
Micro switch	change-over contact
Contact rating Max. 250 V AC Max. 250 V DC	 Max. 5 A resistance or inductive load current 0.25 A resistance or 0.02 A inductive load current
Installation	screwed in instead of the visual position indicator

The electrical position feedback is screwed in, instead of the visual position indicator. While the valve is opening, the piston of the actuator lifts a palm-button. This button actuates a micro switch with change-over contact, which gives the electrical feedback of the valve position. The palm-button also acts as an optical position indicator.

Type 1071, external magnetic inductive position feedback

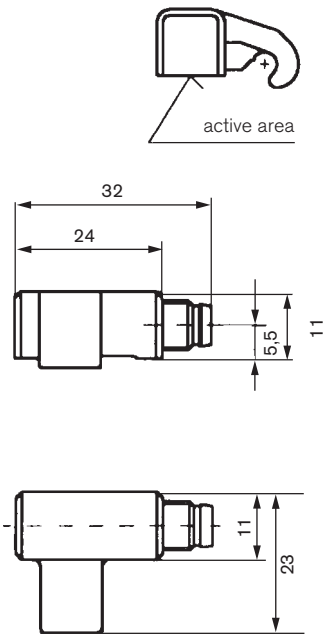

The magnetic-inductive sensors react to the approach of the magnetic piston of the series 2XXX piston operated seat or diaphragm valves. Thus, the piston position can be optically and electrically displayed with an LED. In addition it permits the use of a stroke limiter or manual override.
